

Step 1: Right click on one of the tables in the right panel and select “Table Data Import Wizard”.

Step 2: Select the corresponding file to import the data from.

The screenshot shows a 'Table Data Import' dialog box with a title bar containing a blue icon, the text 'Table Data Import', and standard window controls (minimize, maximize, close). The main area has a light gray background. At the top left, the text 'Select File to Import' is displayed in blue. Below this, a bold black message states: 'Table Data Import allows you to easily import CSV, JSON datafiles. You can also create destination table on the fly.' Underneath the message is a 'File Path:' label followed by a text input field containing the path 'C:\Users\balex\Documents\project\dataCSV\mentioned.csv'. To the right of the input field is a blue 'Browse...' button. At the bottom right of the dialog are three buttons: '< Back' (disabled), 'Next >' (active), and 'Cancel' (disabled).

Table Data Import

Select File to Import

**Table Data Import allows you to easily import CSV, JSON datafiles.
You can also create destination table on the fly.**

File Path: [Browse...](#)

< Back Next > Cancel

Step 3: On the next screen make sure that “Use existing table” is selected then select next. After that, you will come to the screen below. Ensure that the data columns correspond.

Step 4: Select next to execute the import.

The screenshot shows a window titled "Table Data Import" with standard window controls (minimize, maximize, close) in the top right corner. The main content area is titled "Import Data" in blue. Below the title, a message states: "The following tasks will now be performed. Please monitor the execution." This is followed by two radio button options: "Prepare Import" and "Import data file". Below these options, a message says: "Click [Next >] to execute." At the bottom left, there is a "Show Logs" button. At the bottom right, there are three buttons: "< Back", "Next >", and "Cancel".

Table Data Import

Import Data

The following tasks will now be performed. Please monitor the execution.

☐ Prepare Import

☐ Import data file

Click [Next >] to execute.

Show Logs

< Back Next > Cancel

Step 5: Repeat these steps for each table in the database.
